2016 Spring Task Force Summit | Pittsburgh, Pennsylvania
Friday, May 6, 2016
12:15 – 1:30 PM

12:15 PM Lunch is Served

12:30 PM The Future of Distributed Generation: A Balanced Path Forward

Across the country, there is growing interest in using rooftop solar panels and other small scale, on-site power sources collectively known as distributed generation. To encourage the introduction of these systems when they first came to market years ago, many states introduced policies to incentivize electric customers to adopt rooftop solar. This session will explore the most fair and appropriate ways to balance consumer demand for distributed generation with the impacts these new technologies have on the electric power grid.

1:30 PM Adjournment
